Products

Year

2026

Taliferro ® Is Registered In The U.S. Patent And Trademark Office.

About Us

We help organizations better use technology to find new ways to reduce expenses, increase profits, sync systems more smoothly and securely, and produce beneficial info from their data.

Employing top-notch IT, project management, and data tools to achieve business goals enables us to satisfy all stakeholders.

Expertise

01 Agile

We help Scrum Masters and Product Owners apply the appropriate frameworks and techniques in Agile environments.

02 APIs

We help API Designers in Software Development to create highly cohesive yet loosely coupled APIs by leveraging RESTful design principles and OpenAPI specifications..

03 Architecture

We help Cloud Architects in Cloud Services to accelerate digital transformation by leveraging containerization and micro-services.

04 Gateways

We help API Gateway Managers in API Operations to augment API traffic management by employing APIGEE's dynamic routing and API quota functionalities..

05 Data

We help Data Architects in Data Management to architect scalable data models by implementing denormalization techniques for read-optimized systems.

06 Software

We help Web Development Managers in Website and Custom Development to elevate user interface design by employing a test-driven development approach.

07 Commerce

We help E-commerce Managers in E-commerce Operations to optimize customer conversion rates by leveraging data analytics for real-time personalization.

08 Machine Learning

We help Machine Learning Engineers in Machine Learning R&D to enhance model performance by utilizing advanced hyper-parameter tuning techniques.

09 Optimization

We help DevOps Engineers in Infrastructure Optimization to improve website load times by adhering to website optimization best practices such as lazy loading, image compression, and code splitting.

10 Social Media

We help Social Media Managers in Social Media Marketing to boost organic reach and engagement by implementing machine learning-driven algorithms to optimize posting times.

Client Feedback

Ed Lambert
Director
AT&T

Ty authored the bulk of AT&T's Guidelines for RESTful API Design. This document is an extremely useful compendium of best practices that we have used to drive consistency …

Leslie Turkson
Managing Director
Deloitte

Ty is an accomplished software architect with excellent interpersonal and client facing skills. Ty can be counted upon to architect and deliver complex software applications …

Ken Crimson
Associate Director
KPMG

I found Ty to be very methodical and centered as he guided a development team through the process. He brought a well grounded demeanor to a relationship that is often tainted from the start with a development teams …
